

Getting ready for the Conference

On 10 and 11 December - the time has finally come, the 10th Reveal Conference of the consortium of the CIM, PITCH and JOB BRIDGE project will take place with the motto:

**How to avoid a learning lockdown online?
Creativity, innovation and digitalisation at the interface between education, volunteering and business.**

Accelerated digitalisation brings challenges and opportunities for activities in all sectors. How can we foster the visual, fast-paced and expansive potential of online tools while preserving the collaborative, creative and social perspectives that face-to-face interactions offer? How might these innovative digital formats help solve some of the problems created by the COVID-19 crisis?

These are the questions that the 10th REVEAL conference will address. This year we are bringing together professionals from formal and informal education, companies, chambers, NGOs, National Agencies, EACEA, volunteers and students from across Europe to focus on new approaches to embed creative, innovative and digitally supported learning approaches in different educational contexts.
